The practice of naturopathic medicine includes modern and traditional, scientific, and empirical methods. Naturopathic medicine is a distinct primary healthcare profession, emphasizing prevention, treatment, and optimal health through the use of therapeutic methods and substances that encourage individuals' inherent self-healing process. Naturopathic physicians manage and seek to prevent acute and chronic illnesses to restore and establish optimal health.

Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain, back pain, headaches, vertigo, and a long list of other ailments and conditions. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself naturally, without the use of medication or surgery. Although Dr. Lara did this for decades she became intrigued with the protocols and treatment of Airrosti and now works on fascia promoting soft tissue healing and relief of pain. Helping many patients heal in three to four visits.
