

John N. Bibawy, MD, FACC, FHRS, a Cardiac Electrophysiologist with Florida Electrophysiology Associates

Get to know Cardiac Electrophysiologist Dr. John N. Bibawy, who serves patients throughout the State of Florida.

New York City, New York Aug 22, 2023 (Issuewire.com) - A committed cardiac electrophysiologist,

Dr. Bibawy is affiliated with Florida Electrophysiology Associates, with offices in Atlantis, and Boynton Beach. He performs a wide range of complex procedures, such as advanced antiarrhythmic management, intricate device-based therapies, and the insertion of various pacemakers and defibrillators, including cutting-edge techniques like His and Deep Septal Physiological Pacing.

Furthermore, he is adept at both right- and left-sided simple and complex ablations, often requiring specialized approaches such as trans-septal and retrograde access. His capabilities also encompass cryo balloon and radiofrequency ablation for atrial fibrillation, complex ablations in the left atrium, VT ablations, and a strong focus on fluoro-less ablations and advanced mapping techniques. His skill also allows him to complete these procedures with higher-than-average success and excellent patient outcomes.

Dr. Bibawy's proficiency in procedures is matched by his comfort in using innovative tools such as an intracardiac echocardiogram (ICE) and his ability to perform high-risk lead extractions with precision using traction and laser for safe removal. He has also been at the forefront of adopting novel procedures and technologies, including the Watchman left atrial appendage closure device, leadless pacemakers like the Micra, and Impulse Dynamics Cardiac Modulation for refractory heart failure patients.

With a broad educational background, he attended the Ross University School of Medicine, where he laid the foundation for his medical career. Following this, he pursued his passion for internal medicine at Northwell Health Hofstra School of Medicine, before completing a fellowship in cardiovascular medicine at the same educational venue. His dedication to learning and advancing his knowledge continued with a fellowship in clinical cardiac electrophysiology at the University of Rochester Strong Memorial Hospital, focusing on the specialized field of cardiac rhythm disorders.

An authority in his field, the doctor is board-certified in cardiovascular medicine, clinical cardiac electrophysiology, and internal medicine by the American Board of Internal Medicine (ABIM) as well as echocardiography by the National Board of Echocardiography (NBE). The ABIM is a physician-led, non-profit, independent evaluation organization driven by doctors who want to achieve higher standards for better care in a rapidly changing world.

Achieving fellowship status, he is a Fellow of the American College of Cardiology (FACC), and a Fellow of Heart Rhythm Society (FHRS).

Clinical cardiac electrophysiology (also referred to as cardiac electrophysiology, arrhythmia services, or electrophysiology), is a branch of the medical specialty of cardiology and is concerned with the study and treatment of rhythm disorders of the heart. An electrophysiologist is a type of cardiologist. They focus on the heart's timing or electrical system, and on diagnosing and treating irregular heartbeats or arrhythmias. They are also qualified to perform special tests of the heart's electrical system, such as an electrophysiology study or an ablation.

Throughout his career, Dr. Bibawy's exceptional contributions have been recognized by his peers and colleagues. He was honored with the Hofstra School of Medicine Teaching Associate Award, a testament to his dedication to sharing his expertise and shaping the next generation of medical professionals.
