Atlanta, Georgia Aug 25, 2023 (Issuewire.com) - [Terminal Cancer is a Misdiagnosis: Discover a Palliative Care Alternative Medicine You Can Survive](#) by Danny Carroll, based on the findings of Dr. Ryke Geerd Hamer is a **#1 Bestseller** in Alternative Therapies, Two-Hour Biography & Memoirs Short Reads, and Two-Hour Self-Help Short Reads, and a **#1 New Release** in: Cancer, Alternative Medicine,

Alternative Therapies, Biography of Medical Professionals, Two-Hour Biography & Memoirs Short Reads, and Two-Hour Self-Help Short Reads on Amazon.

Terminal Cancer Is a Misdiagnosis explores the medical findings of German medical doctor, Dr. Ryke Geerd Hamer. In 1978, two months after the untimely death of his 19-year-old son, Dr. Hamer was diagnosed with two forms of cancer, and he was given a 1% chance of survival. Using his years of medical experience and knowledge, and against all odds, he survived.

From his personal experience in dealing with cancer, Dr. Hamer then spent close to four decades working directly with over 50,000 terminally ill patients. In his research, he observed that cancer is a "survival" biological program, and Dr. Hamer offers a new way to view cancer treatment. Dr. Hamer developed Germanic Healing Knowledge (GHK), his personalized alternative healing approach to terminal illness.

If you have been given a diagnosis of incurable, terminal cancer by a medical doctor and sent home to die, this may be the book for you. From Dr. Hamer's perspective learn:

- Why many diagnoses are incorrect
- About his six-year study which resulted in the survival of 85% of cancer patients
- How to switch off excruciating pain triggered by a terminal diagnosis by using your mind-body connection
- Principles and healing protocols that can be applied to all cancer diagnoses, regardless of stage
- A music therapy to place your disease on hold while you address its origins

This book is an introduction to Dr. Hamer's medical discoveries and is followed by a book series that does a deep dive into different diseases and illnesses based on Dr. Hamer's findings. Learn and compare the Conventional Medicine and Germanic Healing Knowledge approach to the cause, symptoms, and treatment of each disease. Readers decide which is more compelling.

Dr. Hamer's pioneering work opens up new possibilities for a more comprehensive and personalized approach to healing, inviting a paradigm shift in the entire world of alternative medicine.

Danny Carroll is the International bestselling author of *Terminal Cancer is a Misdiagnosis: Discover a Palliative Care Alternative Medicine You Can Survive*, recognized teacher, public speaker, and Germanic Healing Knowledge (GHK) alternative health practitioner. Originally from the UK, he attended the London School of Economics and later moved to India where he now lives and works. After experiencing many serious health challenges, Carroll set out to find a path to health and wellbeing and discovered German medical doctor Ryke Geerd Hamer's (1935-2017) work. As a practitioner of Germanic Health Knowledge, Carroll offers workshops teaching doctors, nurses, and medical professionals this new mind-body approach to health and well-being. <https://danny-carroll.com>

WARNING: This book is not for everyone. If you believe that the foundation principles of conventional medicine are beyond question, this book is not for you. If you have the conviction that chemotherapy, surgery, and radiation are the only possible treatments for cancer, please do not buy this book.
