

## With the KOLZOV plates in harmony with the environment

KOLZOV plates: Protect your health from harmful electromagnetic radiation and restore your body's natural self-healing powers.

**Munchen, Bayern Aug 8, 2023 ([Issuewire.com](http://Issuewire.com))** - Vitality, performance, health. How important personal well-being is, one becomes aware at the latest when it is attacked. We would like to introduce you to a discovery that can help you maintain health and prevent illness.

[Kolzov Platten](#) or also called "FSC" (Functional State Corrector) - is a unique development of the Russian scientists under the leadership of Dr. Sergey V. Kolzov. The device is a product for medical purposes and is designed to protect against external aggressive electromagnetic radiation, among other things. FSC manufacturing techniques are related to the organizing principles of electromagnetic fields at the cellular level in a living organism.

In FSC by pictorial information, the harmonic rhythms of a magnetic field of the Earth and external radiation are logged. The FSC makes a favorable influence on the organism as a whole or its particular functions. Through the KOLZOV plates the synchronizations of internal rhythms of the organism with the rhythms of an external field, which are one of the basic criteria for the maintenance of health, are united.

The FSC also recorded the necessary information for the counteraction of psycho-power influences and neutralization of biopathogenic fields. The FSC can correct directional frequency characteristics from the Hartman diagram of the Earth (deviations in the Earth's magnetic field and radiation, and thus called hazardous to health). The information on the KOLZOV plates can also vary for functional purposes; there are currently eight different plates.

**However, all plates contain three basic functions:**

protection from electromagnetic radiation (electrosmog)

Structuring and vitalization of fluids ("spring water quality") Restoration of the body's own self-healing powers by correcting existing interference fields.

Since [Kolzov-Platten](#) are designed for all living beings, they benefit not only humans but also plants and animals.

Special KOLZOV plates for hormonal balance in men and women, combating addictions (alcoholism, smoking cessation, depression, etc.), cosmetic support (including skin cleansing and tightening), or melatonin increase can be used, among others.

Based on the long-term research on the use of Kirlian action for diagnostic purposes, Georgian biophysicist MI Shaduri writes in his book:

"Elements of Biosystems Organism structure communicate among themselves by means of images. Nature uses the same mechanism for remote interactions between organisms. The concept of health means harmonious work of all organs and systems, harmony with the environment".

Therefore, the KOLZOV plates are the prerequisite for health, recovery of synchronization of internal rhythms with the rhythms of an external field.
