

SAP S/4HANA Cloud Recognised as a Leader in the 2023 Gartner® Magic Quadrant™, Reports Geeky News

Surrey, United Kingdom Sep 22, 2023 ([IssueWire.com](https://www.issuewire.com)) - Geeky News recently published an article about SAP S/4HANA being recognised as a Leader by the 2023 Gartner® Magic Quadrant™ for Cloud ERP for Service-Centric Enterprises. This achievement marks the second consecutive year SAP has been acknowledged for its outstanding completeness of vision and impressive ability to execute within this domain.

Jan Gilg, president and chief product officer of Cloud ERP at SAP, emphasised the significance of this recognition in addressing the technology needs of service-centric enterprises. He stated, "The recognition is based on our completeness of vision and ability to execute in the cloud ERP market for service-centric enterprises. As service-centric enterprise customers transition their mission-critical ERP processes to the cloud, we believe they look to recognised vendors for the technology to transform and realise business value.

"According to Gartner, 'Leaders execute well against their current vision and are well positioned for tomorrow.' We're honoured to be recognised in this space."

The Gartner Magic Quadrant is a comprehensive report that identifies the market forces driving industry

conclusions based on specific parameters. The report provides insights into Gartner's definition of "composable ERP" as "an adaptive technology strategy that enables the foundational administrative and operational capabilities for an enterprise to keep pace with change."

SAP's commitment to assisting service-centric enterprises in driving digital transformation aligns seamlessly with Gartner's vision behind the Magic Quadrant report. The company believes its inclusion in this prestigious report is a testament to its focus on delivering customer-oriented cloud solutions that address industry needs and foster growth and profitability.

"No matter what industry you are in, there is no greater benchmark of success than customer feedback," said Thomas Saueressig, member of the Executive Board of SAP SE, SAP Product Engineering. "The more feedback we get from our customers, the better we can serve them with innovations that help companies solve today's business problems and take on tomorrow's challenges. With SAP S/4HANA Cloud, they are best positioned to do so impactfully and sustainably."

In an ever-evolving digital landscape where organisations are increasingly migrating their business-critical ERP processes to the cloud, SAP has emerged as a trusted technology partner, efficiently driving transformation and the realisation of significant business value. As noted by Gartner, Leaders in this space "execute well against their current vision and are well positioned for tomorrow."

SAP S/4HANA Cloud, powered by AI and analytics, has been recognised as a complete, composable cloud ERP solution that runs on the SAP HANA in-memory database. It enables users to access their data virtually, faster, and in real-time, thereby streamlining processes. SAP S/4HANA Cloud is the Software-as-a-Service (SaaS) version of the SAP S/4HANA ERP system. It delivers actionable insights that enterprises need the digital transformation of their business operations, navigate evolving business landscapes, and expand globally while maintaining sustainability.

However, implementing SAP is a complex process, requiring expert services to ensure that SAP-centric enterprises can effectively deploy SAP tools, build an efficient work environment, and realise strategic business outcomes from their SAP investments.

Enterprises seeking to speed up their digital transformation journey by going live with SAP are encouraged to leverage high-end SAP implementation services such as [Protera](#). These services ensure the seamless integration of systems while minimising data loss, errors, and redundancies during the implementation process.
