Be among the first to experience this captivating film! In the world of classical music, few artists dare to break the rules and create something transcendent. One such artist is Lubomyr Melnyk, the Ukrainian pianist known for his groundbreaking style of playing called Continuous Music. From a young age, Lubomyr displayed incredible talent on the piano. Trained in the classical tradition, he yearned to challenge the boundaries of traditional music. Through experimentation, he discovered new techniques, creating a continuous stream of sound with his fingers and the sustain pedal. His music became a fusion of classical and avant-garde, ethereal and hauntingly beautiful.
