Built in Wi-Fi,
Evolution of the Compact Dash cam

THINKWARE DASH CAM F70 PRO

London, United Kingdom Dec 10, 2023 (Issuewire.com) - World-leading dash cam brand THINKWARE has launched its latest product, the F70 PRO. Building upon the success of its critically acclaimed predecessor, the F70 PRO takes dash cam performance to new heights with a super compact size, 1080p Full HD front camera, parking surveillance, and anti-file corruption software.

The F70 PRO is packed with features designed to make recording and file retrieval straightforward, while guaranteeing top-notch video quality. With Advanced Video Clear technology, a 140° wide angle lens, and 2.1MP CMOS sensor able to capture footage at 30 frames per second (fps), the F70 PRO ensures that every second of your journey is covered.

The F70 PRO is designed with energy-saving capabilities and motion and impact detection in parking mode, ensuring your vehicle is protected against theft, vandalism, and hit-and-run incidents around the clock. When parked, drivers have the option to activate continuous recording with time-lapse photography at 2 fps, particularly useful in high-risk areas. Additionally, for enhanced safety, the optional GPS antenna equips the F70 PRO with the ability to provide real-time alerts for speed cameras and red light cameras, aiding drivers in maintaining lawful and safe driving practices.

The F70 PRO is user-friendly, featuring built-in Wi-Fi and Bluetooth for effortless pairing with any iOS or Android device. This allows for easy access and retrieval of footage at your convenience, regardless of your location. The dash cam's compatibility with MicroSD cards up to 128GB ensures ample storage for extensive footage. Additionally, its Anti-file Corruption technology ensures the safety and integrity of your data under any circumstances.

Designed to deliver the best possible performance as simply as possible, THINKWARE's F70 PRO is one of the most advanced dash cams currently on the market, combining simple useability with incredible technical performance. It even helps to protect itself and prolong its lifespan, with the Thermal Protection Supercapacitor automatically moving the dash cam into low power mode when the temperature of the parked vehicle rises.

THINKWARE Spokesperson comments: 'We are really excited to announce the launch of the F70 PRO. It carries all the features of its predecessor, the highly acclaimed F70, and enhances them with Wi-Fi connectivity, smart parking mode, super night vision, and energy saving features, creating a fully rounded device suited to the needs of the modern driver.'

'The demand for dash cams has increased dramatically during the last five years. This is partly due to the enhanced performance of the hardware, enabling people to record high quality footage of their driving experience, potentially protecting themselves against vehicle theft, legal liability, and dishonest insurance claims. With the F70 PRO, dash cam technology has improved once again, creating the ultimate device for all vehicle types.'

About THINKWARE

Global IT Corporation THINKWARE DASH CAM was founded in Korea in 1997. Through consistent research and development in the field of smart car technologies, THINKWARE DASHCAM has established itself as the market leader in various sectors such as dash cams, electronic maps, navigation, mobile applications, and tablet PCs.

Spearheading the competition with world-class image processing technologies and an intuitive, user-friendly interface, THINKWARE DASH CAM debuted in the US market in 2014. THINKWARE DASH CAM has confirmed it will be exporting its DASH CAM lineup into 17 other countries, including the US, Canada, UK, and Japan.

THINKWARE DASH CAM has continued to astound the industry with its world-class DASH CAM lineup

during its presence at global exhibitions like CES, SEMA, and The Gadget Show Live. For CES2017, the world's largest consumer electronics show, THINKWARE received the Innovation Award of the Year for excellence in technology and design. The company has also received the IF, IDEA, and Red Dot Design Award.
