

Texas Emergency Care Center in Pearland Offers Tips for Preventing RSV Transmission

Pearland, Texas Dec 27, 2023 ([Issuewire.com](https://www.issuewire.com)) - As RSV (Respiratory Syncytial Virus) cases rise, the Texas Emergency Care Center in Pearland emphasizes the importance of awareness and prevention strategies to protect our community. Our [emergency room near you](#) is at the forefront of addressing this health concern with expert care and vital information.

Understanding RSV and Its Impact

RSV is a common respiratory virus affecting individuals of all ages, mainly infants and the elderly. It can lead to severe respiratory illnesses like bronchiolitis and pneumonia. Recognizing symptoms early is crucial, and they often include coughing, sneezing, fever, and difficulty breathing.

Preventive Measures Recommended by Texas Emergency Care Center

- **Hand Hygiene:** Consistent hand washing with soap and water for at least 20 seconds, primarily after contact with sick individuals, is vital.
- **Avoid Close Contact:** Stay far away from those who are sick. Avoid kissing, hugging, and sharing utensils or cups with those who have respiratory symptoms.
- **Clean and Disinfect Surfaces:** Frequently touched surfaces in the home, including doorknobs and toys, should be cleaned and disinfected regularly.
- **Cover Coughs and Sneezes:** Teach children to cover their mouth and nose with a tissue or elbow when coughing or sneezing.
- **Stay Home When Sick:** If you or your child have [symptoms of RSV](#), it's important to stay home to stop spreading the virus to others.
