Proudly We lunched One the Next Stone of Magtech That is Roboscan - Under vehicle surveillance robot.

The ROBOSCAN is a cutting-edge wireless under vehicle surveillance robot designed by Magtech to meet the security requirements of different types of enterprises.

This [Robot UVSS](#) is Advanced Under Vehicle Surveillance System is distinguished from other surveillance systems available on the market by a number of features, including front-end scanning and top-mounted cameras for multi-view reconnaissance. The 2-way HD surveillance camera module records crisp, detailed footage, while the top-view scanning camera module produces high-quality

photos with a resolution of 4K pixels.

Robotoscan's controlled LED fill light function allows lightning to sense and switch on its own, depending on which way the car's roof, side, and front are facing. Due to its small size, it can work in low- and narrow- clearance areas quickly and efficiently for quick inspections. ROBOSCAN can be utilized for detonation site explosive searches, under vehicle detection, hazardous area identification, and much more.

ROBOSCAN is easy to use, with an anti-lock braking system for safe loading, wireless picture and control communication links, and a number plate recognition feature. It's perfect for security checks at government buildings, courthouses, public security checkpoints, concerts, large-scale conferences, and other venues. ROBOSCAN, with its complete features and high-quality performance, is a must-have for diligence that bears fast and successful security inspections.

ROBOSCAN can be utilized for detonation site explosive searches, under vehicle detection, hazardous area identification, and much more.

ROBOSCAN is easy to use, because of Wireless UVSS system with an anti-lock braking system for safe loading, wireless picture and control communication links, and a number plate recognition feature. It's perfect for security checks at government buildings, courthouses, public security checkpoints, concerts, large-scale conferences, and other venues. ROBOSCAN, with its complete features and high-quality performance, is a must-have for diligence that bears fast and successful security inspections.
