

Saatvik Solar Appoints Celestial as their channel partner to market Saatvik Modules across Maharashtra and Goa region

Delhi, India Jan 9, 2024 ([IssueWire.com](https://www.issuewire.com)) - Saatvik Solar, the leading Solar PV module manufacturer has recently appointed Celestial as their exclusive channel partner for Maharashtra and Goa. This strategic alliance is intended to strengthen Saatvik Solar's footprint in the defined region and expand its distribution network for solar modules. As a channel partner, Celestial will work jointly with Saatvik Solar to market and sell a diverse variety of Saatvik Solar modules. This partnership is consistent with the

firms' common aim of boosting the use of solar energy to meet Maharashtra's and Goa's energy demands and contribute to a greener, more sustainable future.

Both Saatvik Solar and Celestial are enthusiastic about the collaboration's potential to increase access to solar energy for businesses and residences in Maharashtra. The agreement is a big step toward meeting the state's renewable energy targets and promoting a cleaner, greener environment. Celestial, which is recognized for its expertise in renewable energy solutions and dedication to sustainable practices, will play an important role in increasing Saatvik Solar's reach throughout Maharashtra. The alliance intends to capitalize on the state's rising need for sustainable, environmentally friendly energy alternatives.

Mr. Pushpendra Samadhiya: - National Head - Of Sales stated that “Saatvik Solar” expressed confidence in Celestial's ability and commitment to promoting solar energy solutions. The relationship is expected to benefit from Celestial's strong local presence and industry understanding, resulting in improved customer engagement and service delivery.

Celestial Renew Experts is India's leading organization, delivering a premium range of solar products. The company provides support for electrical infrastructural development and provides services for coordination with government agencies for solar net-metering and all other approvals.

Saatvik Solar is recognized among the “Top Solar Module Manufacturers” in India with an annual production capacity of 3GW/Annum. Since its inception, the company has supplied more than 2GW+ High-efficiency Solar PV modules across domestic and international markets. As per the expansion plan company is planning to set up an additional state-of-the-art integrated cell and module manufacturing unit in the USA by the financial year 2024-25 end. Saatvik supplies premium quality Solar PV modules for utility, residential, and commercial projects.
