

## **AmSoS: Elevating School Security, Crafted by Softexploit, Presented by BE Smart**

Ensuring Fast Response to Emergencies in German Educational Institutions - Innovative School Security Solution, Developed by Softexploit, Launched by BE Smart, Overseen by German Education Government.

**AmSoS**

**London, United Kingdom Mar 1, 2024 ([IssueWire.com](https://www.issuewire.com))** - In a groundbreaking collaboration, Softexploit, a leading software development company based in London, England, has partnered with BE Smart, a forward-thinking startup, to introduce AmSoS in Germany.

The German Education Government has committed to governing and overseeing this initiative, signifying a monumental step towards enhancing the safety and security of educational institutions in Germany.

**Revolutionizing School Security with AmSoS:** AmSoS aims to revolutionize school security by enabling swift responses to emergencies. The app provides teachers with a fast response software system, allowing them to inform all stakeholders immediately in life-threatening situations such as shooting sprees. This proactive approach to security ensures that potential dangers are detected early, and appropriate actions can be taken promptly.

**Key Features:**

**Tailored School Management Web App Panel:**

AmSoS offers personalized control and oversight of security measures through management panels for each school.

**User-Friendly Apps:** AmSoS Apps prides itself on its intuitive Android and iOS applications, meticulously crafted to prioritize user-friendliness and accessibility for all members of the school community.

**Crisis Team Integration:** A specialized section for crisis team agents of each educational institution facilitates swift and coordinated responses during emergencies.

**Real-time Monitoring:** The platform enables real-time monitoring of security parameters, providing instant alerts and notifications to relevant authorities of each school and govt.

AmSoS meets the highest standards of reliability and security.

MD Mahir Tazwar, Founder & CEO of Softexploit, expressed his excitement about revolutionizing school security in Germany and highlighted AmSoS as a testament to their commitment to leveraging technology for the greater good.

Khalid Ebanhesaten & Ali Badre, Co-Founders of BE Smart, emphasized their pride in partnering with Softexploit to deliver AmSoS to German educational institutions, citing it as a milestone in utilizing technology to enhance the safety of educational institutions.

**Government Oversight:** The German Education Government ( the Federal Ministry of Education and Research) is committed to governing & overseeing the implementation and monitoring of the software across educational institutions in Germany, ensuring compliance with safety standards and regulations.

**About Softexploit:**

Softexploit Pvt. Limited is a leading software development company headquartered in London, dedicated to creating Business and SaaS solutions that address the evolving needs of businesses and industries worldwide.
