

## **Jeffrey Durgin, MD, FACS, a General Surgeon with NTMC Health Surgical Specialists of North Texas**

Get to know General Surgeon Dr. Jeffrey Durgin, who serves patients in Gainesville, Texas.

**New York City, New York Feb 26, 2024 ([IssueWire.com](https://www.IssueWire.com))** - A seasoned general surgeon, Dr. Durgin stands as a stalwart in the realm of general surgery, bringing forth a wealth of experience and expertise garnered through years of dedicated practice. With a comprehensive understanding of all facets of general surgery, he is a professional adept at handling a diverse range of surgical procedures, from trauma cases to routine surgeries.

Academically, his journey in medicine began with a solid educational foundation, earning a Bachelor of Science degree from Angelo State University followed by a medical degree from the esteemed University of Texas Medical School in San Antonio, Texas. Driven by his passion for surgical excellence, he pursued residency training at Scott and White Memorial Hospital, affiliated with Texas A&M University, where he honed his skills under the guidance of renowned mentors.

Dedicated to clinical excellence, the doctor is board-certified in general surgery by the American Board of Surgery (ABS). The ABS is an independent, non-profit organization located in Philadelphia, Pennsylvania, founded for the purpose of certifying surgeons who have met a defined standard of education, training, and knowledge.

Dr. Durgin's commitment to serving others extends beyond the operating room, as evidenced by his exemplary service as an Iraqi war veteran. With two tours as a trauma surgeon under his belt, he has firsthand experience in managing complex and high-stakes situations with poise and precision. Throughout his distinguished career, he has held esteemed positions such as Chief of Surgery, Chairman of Surgery, Co-director of the ICU, and Trauma Medical Director, where he has demonstrated exemplary leadership and clinical acumen.

General surgery is a surgical specialty that focuses on abdominal contents including the esophagus, stomach, small bowel, colon, liver, gallbladder, appendix, as well as the thyroid, parathyroids, and adrenals. A general surgeon performs a wide range of abdominal surgeries for many forms of intestinal and abdominal wall hernias, groin hernias, gallbladder disease, and thyroid related cancers. They follow the patient through critical care and surgical recovery all the way to outpatient care.
