

Mr. Vipin Khutail addressed India's top occult science enthusiasts in Delhi

India's Top Occult Science Enthusiasts Gather at AgyatOnSearch Awards & Seminar in New Delhi

New Delhi, Delhi Feb 29, 2024 ([IssueWire.com](https://www.issuewire.com)) - India's top occult science enthusiasts gathered in New Delhi on February 28, 2023, for the #AGYATONSEARCH Awards & Seminar, a unique event organized by Rajen Vijay Babbuta, Anjali Kapoor Dhameja, and Neha Bhatt Suri at the Constitution Club of India.

Supported by Vipin Khutail, founder of "Being Topper" and India's leading digital marketing expert and trainer, the seminar aimed to promote and discuss various aspects of occult sciences and studies.

The event was deliberately held on National Science Day to convey the message that occult practices have a purely scientific basis. It was emphasized that Western practices have roots in India's Vedic age and were marketed by the West, while Indian practices were deliberately defamed through false propaganda, as Mr. Vipin Khutail explained.

Mr. Vipin Khutail is a renowned digital marketer and entrepreneur in India. Passionate about social causes and promoting positive change, he has established himself as a prominent figure in the industry. Through his initiatives and programs, Mr. Vipin Khutail continues to create opportunities to recognize

and celebrate individuals working towards social improvement.

The Constitution Hall of India resounded with applause when a young leader, Vipin Khutail, raised his voice in favor of the Sanatan Dharma:

"A search, a research, on the power of scriptures, AgyatOnSearch is a subject of science. Indian knowledge and science were defamed, Called superstition, hypocrisy – or given the name of mystery. Astrology, numerology – these are all Indian disciplines, The most intense forms of science, contained within themselves. All that is needed is to awaken them once again, To spread this Indian knowledge throughout the world. The time has come to awaken ancient knowledge, To shake the world with the amazing power of the scriptures."

With these words, Mr. Khutail's historic speech began. Let's read the complete speech that gave a new direction to the younger generation.

He said: "I, Vipin Khutail, Founder of the Being Topper Institute, welcome all the esteemed guests at a special event, AgyatonSearch-23, organized today at the Constitution Club of India. I assure you all that today's event is going to be very special. The audience here is not just any ordinary audience. Today, many distinguished personalities have graced this event with their presence. We feel honored and welcome everyone for their special presence."

The importance of language in the event title

"We have given priority to Hindi over English in the title of this program for a special reason – to make today's event one of national pride. In this special program, we will learn how people who imitate Western civilization have sidelined the profound knowledge and science hidden in Indian scriptures by labeling them as hypocrisy and superstition. We will also discuss how Western countries have taken away all the credit for scientific progress away from India.

India: A nation with a rich scientific legacy

India, a country that has always been called the 'Vishwaguru' (world leader), a country where civilization first flourished, a country where science reached its peak even during the Ramayana and Mahabharata eras... we still find much evidence of this through archaeological discoveries. Given this, how can we possibly consider the profound knowledge and science described in India's scriptures, such as astrology, numerology, Nadi Shastra, Rahasya Shastra, etc., as a form of hypocrisy? These are, in fact, the ultimate forms of science.

The marvels of Indian scientific knowledge

Indian astrology exemplifies the brilliance of Indian scientists, their farsightedness, and extraordinary talent. It holds the ability to describe all the important events in a child's future life at the time of birth, or even much earlier. Isn't this the best form of science? The Nadi astrology prevalent in South India presents a detailed account of all the essential events in a person's life based solely on their thumbprint! Is this not an amazing form of Indian science? Western science has yet to reach this level, and what they do not understand, they label as hypocrisy.

Restoring India's rightful place in science

Today's event is one step forward in the mission to establish the knowledge and science described in

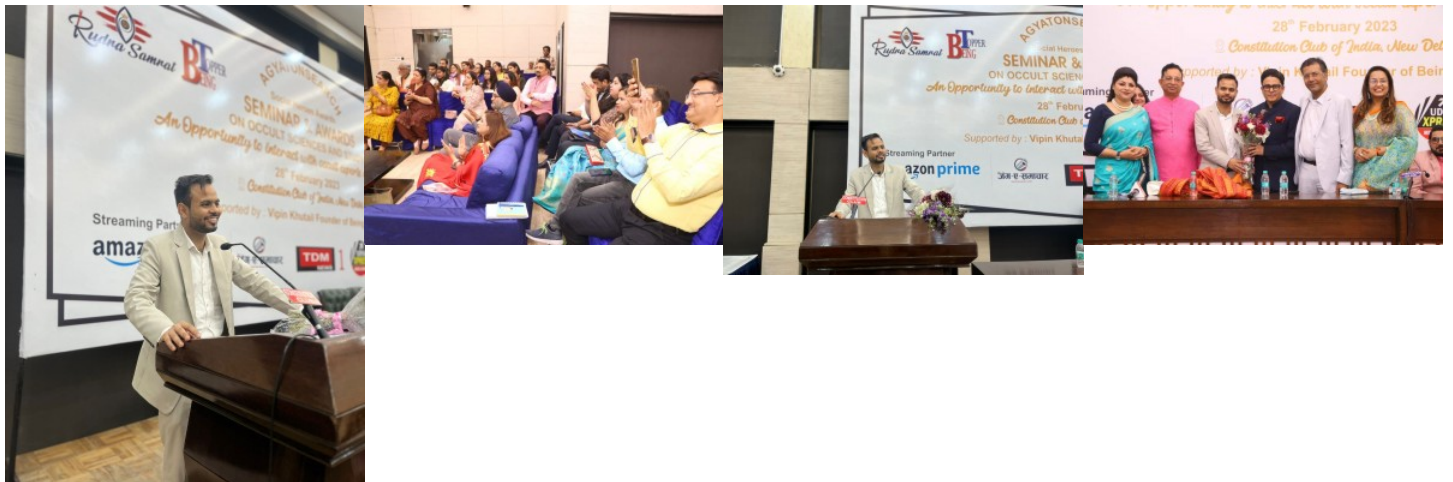

Indian scriptures globally. On this 'National Science Day,' let us send a message to the world: India has been a leading nation in science since before the sun of science rose in other parts of the world.

A Call for thoughtful engagement

I request that we all understand the gravity of this special event and the subject matter. Let's present our narratives thoughtfully, keeping in mind that our audience today comprises highly distinguished figures. Let us move forward with this special program."

Notable Attendees and Discussions

The seminar was attended by several dignitaries, including Shri Raj Kumar Goel, Chief Patron of Aatmanirbhar Bharat Foundation, Smt. SUNITA DUGGAL Lok Sabha M.P. (SIRSA), Sh. Pradeep Gandhi Former MP, Chhattisgarh. The event also drew internationally renowned celebrity astrologer and actor, Dr. Sundeep Kochar, Priyanka Tandon, working with media channels as a Hindu scholar astrologer in News Nation, India News, Zee Hindustan, singing sensation Shri Shankar Sahney, celebrity beauty pageant coach & world record holder Lt. Rita Gangwani, and several great astrologers, healers, numerologists, and tarot card readers from across India.
