

UnicMinds invites you to World Kids Game Coding Competition

Coding Competition for Kids

The banner features a green cartoon turtle wearing glasses and holding a book on the left. A speech bubble above it says "HEY JUNIOR! CAN YOU CODE?". Below the turtle, it says "FOR CHILDREN UP TO 15 YEARS". In the center, the text reads "UNICMINDS WORLD GAME CODING COMPETITION" with the dates "20TH FEB'24 TO 30TH APR'24" in an orange oval. On the right, a boy and a girl are shown coding on laptops. At the bottom, three icons represent prizes: a gift box for "Win Exciting Cash Prizes!", a star for "Chance to be recognized among Top 10 Finalists", and a ribbon for "Certificates & Top 10 Prizes". The background is white with a light blue binary code pattern.

Bengaluru, Karnataka Feb 15, 2024 (Issuewire.com) - UnicMinds invites kids worldwide to participate in its [World Kids Game Coding Competition](#). The competition is open for more than two months from 20th Feb'24 to 30th Apr'24. Kids will have to make a coding game with two levels in any of the block-based platforms or in JavaScript or Python. All children up to 15 years of age qualify for this coding competition.

The top 20 entries will be called for a discussion, and then the finalists will be decided. It is an excellent opportunity for children across the world to test themselves and get recognized as top 10 of a major junior coding competition. The final winners will be announced in the last week of May'24.

The theme for the competition is nature, meaning children have to include an element of nature in the games they submit. Some common sample themes include global warming, environment protection, the animal world, saving the hippo, and more. While the main goal is to raise awareness of STEM and to set a competition among kids in coding skills, the secondary goal is also to let children think about the nature around us.
