

From Silicon Valley to Your Home: Brings Joy Learning Introduces It's Unique K-12 Curriculum

The Kindergarten curriculum now available in USA, Canada, India, and UAE only!

Saratoga, California Mar 20, 2024 ([IssueWire.com](https://www.issuewire.com)) - Brings Joy Learning, a distinguished California-based education company is proud to announce the launch of its innovative, interdisciplinary, unit-style supplemental K-12 curriculum. Founded by long-time educationist and entrepreneur Farida Baxamusa, the curriculum brings forth a revolutionary wave in the educational field with an intense interdisciplinary and holistic approach to education.

In the vast ocean of education, where countless books abound, Brings Joy Learning emerges as an ideal on-the-go supplemental resource for parents who want to be more involved in their child's educational journey, as engaging with curriculum requires as little as 15 minutes of parent-child engagement. It's also ideal for educators who are on the lookout for a curriculum that seamlessly integrates all subjects into a simplified, cohesive experience.

While conventional educational models are designed with distinguished walls between subjects, Brings Joy Learning tears them down. With a strong interdisciplinary approach, the curriculum ensures that learning isn't compartmentalized within subjects. Drawing from over 15 years of passion and commitment in the education sector, Farida Baxamusa unveiled the first set of the curriculum, Kindergarten, on her official website earlier this month.

Introducing the Complete Kindergarten Set:

- Me and My World Unit 1
- Math and English in Everyday Life Unit 2
- Appreciating Nature, Sports, and Review Unit 3

Ideal for children aged 5-6 years, this bundle set aims to introduce young learners to fundamental concepts during their early developmental stages in a holistic way. Aligned with a unit-style study curriculum, these resources extend throughout the entire kindergarten year. With clear engaging activities, lesson plans, readings, and quick-check assessments, this bundle set allows parents to witness and actively contribute to their child's foundational growth and development.

Farida Baxamusa, the visionary behind Brings Joy Learning, brings over two decades of global teaching experience to her groundbreaking curriculum. Her diverse background includes roles as a professor at St. Xavier's College in Mumbai, India, a Waldorf High School teacher in San Francisco and Mountain View, California, and currently a community college professor at West Valley Mission College, Saratoga, California.

Not only this, Farida is also widely known for her unique and adventurous approach to her homeschooling journey. Her homeschooling methods are a source of inspiration for many parents, educators, and students alike. Her commitment to fostering a love for knowledge is at the heart of Brings Joy Learning, which also helped her bag an award at the Business Plan Writing Competition organized by Al Tijaarat Al Raabehah, Houston, USA.

"I believe that every child should learn for the love of learning, and not for the mere pursuit of 'good' grades. Children are innately curious, all they need is the right environment to foster that curiosity into a lifelong passion for discovery and growth. Our innovative curriculum at Brings Joy Learning is designed precisely to cultivate this love for learning, providing engaging experiences that inspire curiosity, creativity, and critical thinking in young minds." - Farida Baxamusa, Founder and CEO, Brings Joy Learning.

Currently selling as hot as pancakes in the USA, Canada, India, and UAE, the Brings Joy Learning curriculum is soon to launch the first grade of its K-12 unit-style supplemental curriculum.
