# From Manual to Modern: Rachel Lewis of Stock Yards Bank Shares their Journey with Accounting Automation

**New York City, New York May 2, 2024 (**Issuewire.com**)**  -  SkyStem LLC, a leading provider of month-end close automation software, has partnered with Banking Exchange for a special interview with Rachel Lewis of Stock Yards Bank. Rachel is currently the Assistant Controller at Stock Yards Bank & Trust which is based in Kentucky. She has been with the company for 10 years and has spent most of her tenure in the accounting department. During this time, Rachel has assisted in many bank-wide projects, and acquisitions, and has spent a significant time training and developing employees.

Rachel dives into how technology is shifting the accounting world and how her and her team have adapted to innovative systems that they have incorporated within their processes. She hands out advice to those looking to do the same in their company and shares how doing so will be life changing in more ways than one.

Hear how to carefully replace manual processes with automation and how to do so with minimal stress and maximum impact here!

## About Banking Exchange

Banking Exchange is an information resource for bankers that brings a deep background of banking knowledge and contacts.

We bring together a team of reporters, bloggers, and editors who have been immersed in banking trends and developments for three-plus decades.

And we bring together bankers—online, in social media, and in person—to facilitate exchange of relevant information and best practices.

## About SkyStem

Headquartered in the heart of New York City, SkyStem delivers powerful account reconciliation and financial close applications for the enterprise that are easy to implement and a pleasure to use.

You will experience implementation in DAYS not MONTHS! Our software-as-a-service (SaaS) delivery model means instant deployment without pre-implementation downtime. Get up and running in a matter of days without compromising the security of your data and without interrupting your business.

Train users in HOURS not WEEKS. We remove the barriers of system adoption by bringing you an unsurpassed user experience. System functionality is based on the user's natural behavior, so that the technology truly complements your financial-close process. Learning becomes intuitive when technology caters to your team instead of the other way around.
