

Global AI Leaders to Lead "AI Futures" Workshop at AI for Good Summit

Global Latin American AI Pioneer Felipe Castro Quiles to Lead Important Conversation on Inclusion in Groundbreaking Workshop at AI for Good Summit, Charting a Path Towards Inclusive and Ethical AI Futures.

Miami, Florida May 24, 2024 ([IssueWire.com](https://www.IssueWire.com)) - In a world where the trajectory of Artificial Intelligence (AI) remains open to our collective shaping, Felipe Castro Quiles, CEO of Emerging Rule and GENIA Latinoamérica, PBC emerges as a beacon of innovation and inclusivity. Harnessing his expertise as a global business leader and researcher, Felipe is set to Participate in the transformative "AI Futures" workshop at the prestigious AI for Good Summit lead by Source Transitions.

Scheduled for May 30th and 31st in Geneva, this visionary workshop convenes thought leaders, policymakers, and changemakers from across the globe. Together, they will chart a course towards AI futures grounded in inclusivity, fairness, and community agency.

Key Themes and Objectives:

Participants in the workshop will embark on an immersive journey to:

- Grasp the multifaceted challenges and opportunities inherent in the AI landscape.
- Explore diverse AI futures, spanning personal, commercial, environmental, and societal domains.
- Co-create preferred scenarios for AI futures, with an initial focus on vital sectors like food systems.
- Forge actionable strategies to steer these envisioned futures, emphasizing informed decision-making and holistic approaches.

Expert Insights and Participatory Process:

Drawing from Felipe's wealth of experience, attendees will benefit from expert insights and a participatory process designed to amplify diverse voices. By embracing inclusivity and welcoming unconventional perspectives, this workshop aims to catalyze innovative solutions for the greater good.

What Participants Will Gain:

Expect to leave this workshop enriched with:

- Valuable insights, connections, and relationships cultivated during interactive sessions.
- Personalized perspectives on the dynamic landscape of AI futures.
- A versatile toolkit comprising diverse methodologies and approaches for shaping the trajectory of AI.
- Opportunities to actively contribute towards tangible actions that materialize inspiring visions into reality.

Who Should Attend:

This workshop extends a warm invitation to all passionate individuals committed to co-creating AI futures in harmony with communities. Whether you are a policymaker, designer, technologist, entrepreneur, social advocate, or community representative, your unique perspective is indispensable in this collaborative endeavor.

Join Felipe Castro Quiles and an esteemed panel of international experts as they delve into the notion of agency within AI futures and unveil innovative pathways for designing, scaling, and refining AI solutions. Together, let us forge a future where AI serves the collective needs of humanity.
