

VSA Procurement Program Prequalifies Mcmtech Asset + Inventory Mgmt Software for Counties and Cities Across the US

Offering government agencies streamlined access to premier mission-critical software solutions purpose-built for public safety

Birmingham, Alabama Jul 3, 2024 (Issuewire.com) - Mcmtech is pleased to announce that it has been chosen as an awarded vendor of the Virginia Sheriffs' Association (VSA) First Responder

Supplies and Equipment Procurement Program. This allows counties and municipalities throughout the United States to purchase **Mcmt**ech solutions through an already available, pre-competed contract, without having to perform their own solicitation and vetting processes.

VSA works with vendors and manufacturers to develop a comprehensive listing of supplies and equipment popular with first responders. VSA then goes out to bid on each item. “We act as an advocate for all public bodies involved in the purchasing process, providing great financial savings and quality customer service as well as a system that is easy to navigate,” says Jason Bennett, VSA Director of Business Development.

“In an effort to serve our most important constituent, our customer, we strive to make the procurement process as easy, efficient, and as cost-effective as possible,” says Tom Bartels, President and CEO of **Mcmt**ech. “Programs like these are a great service, providing agencies with competitive pricing and faster, more streamlined processes. We are pleased to help alleviate some constraints by making all of our solutions available in pre-competed contracts like this one.”

The VSA First Responder Supplies and Equipment contract (Bid 25-01-0524) runs through June 19, 2025. For more information on the program, visit the [program's homepage](#).

To see what other pre-competed contracts are available for **Mcmt**ech solutions, visit [Mcmt](#)ech's [How-to-Buy page](#).
