Manila, Luzon Aug 15, 2024 (Issuewire.com) - Author Wayne E. Criss is delighted to announce that he will participate in the Philippine's largest and longest-running book fair. He is one of the authors to be featured in Bookmarc Alliance's booth at the 2024 Manila International Book Fair this September 11-15, 2024 at the SMX Convention Center in Pasay, Manila.

Three of his titles will be displayed at the event, one of which is ***Nano Trilogy III: Nanotargeted Villages***. A riveting novel that revolves around the journey of the four musketeers as they seek revenge and justice for the deaths of their fathers.

For the past fifteen years, the four musketeers have grown into professionals and have developed their own molecular weapons to counterattack Korrektor Com I and II. But, their efforts are not enough to defeat a new type of super macabre nanotech molecular system that their enemies use. Thousands of innocent lives have been lost and several villages were attacked by the Korrektorizer. Luckily, the musketeers tracked him down, captured him, and initiated their revenge. However, a body was never found.

What happened to the Korrektorizer's body? Did the musketeers succeed with their revenge? Or were they outsmarted by the Korrektorizer? Learn more about Wayne E. Criss' Nano Trilogy at the 2024 Manila International Book Fair or grab a copy online through Amazon, Barnes & Noble, and more.

The author, Professor Doctor Wayne E. Criss, has continuously taught his entire professional life in several private and university-affiliated high technology laboratories and clinics in the USA, Europe, and Asia. He has written numerous medical research papers and books, won more than 20 national and international scientific awards and regularly consulted government and private science funding agencies. As a prominent medical scientist, Dr. Criss is now drawing from his experience and has begun creating exciting novels with unusual "modern" ideas.
