Melbourne, Victoria Oct 18, 2024 ([Issuewire.com](https://www.issuewire.com)) - In this current press note, the sales executive of Shopping Planet has talked about their latest updates on dressing tables and other finishing items. He also shared how their new dressing table models are getting more attention from their customers.

Here we are with some of the simple yet amazing tips to make your cluttered [dressing table](#) decluttered and transform it into a serene and functional space. If you are looking to maximise the efficiency of your dressing table, take a step forward and follow what we advise.

Step 1:

The first thing that you need to do is to remove each and everything from the space and make it all clear. If you feel bored with some items, donate or discard them. Assort the ones that you need the most and keep doing so accordingly. Keeping unnecessary items makes it look messy and confusing too.

Step 2:

After picking out the essentials, divide your dressing table into different zones to store different items. Designate corners for each item separately, like skincare products, hair tools, makeup, accessories, and more. This will help you find the items quickly and prevent things from getting cluttered again.

Step 3:

Does your **dressing table** have storage boxes? If yes, then utilise it. That's one of the best ways to keep your belongings sorted. Consider the drawers to be the safe place to keep the costly ones intact. There are even products that require cool and dry storage. In that case, these storage cabinets can be a good try.

Step 4:

Even if you keep your belongings sorted, it is essential to keep clean and dust out the dressing table. This will make the furniture look better and boost its durability. Dedicate a few minutes every day to make things tidy. It is a good morning routine to keep your dressing table looking fresh and keep your mind fresh too.
