

Robert Seropian Introduces Self-Funded Pension Solutions for Retirement Security

Robert Seropian

Fort Lauderdale, Florida Sep 25, 2024 ([IssueWire.com](https://www.IssueWire.com)) - For many, the volatility of today's markets can feel like a roller coaster ride, with more steep declines than slow climbs. With retirement savings at risk, the financial ups and downs can cause significant anxiety. Robert Seropian, a financial services expert with over 30 years of experience, has a solution for those who want to take control of their financial future without the stress of market unpredictability. His new approach to creating a self-funded pension offers retirees and pre-retirees the stability they need to ensure lifelong financial security.

The Pension Problem: How to Solve It Yourself

In the past, pensions provided a reliable and steady income for retirees. However, most employers today no longer offer pensions, and even when they do, many are underfunded or at risk of defaulting on their pension commitments. As a result, people are left wondering how they can create their own financial safety net.

That's where Robert Seropian's self-funded pension approach comes in. "If your hard-earned savings are riding a roller coaster of market volatility, it's time to rethink your strategy," says Robert Seropian. "You don't need to depend on an employer for a pension—you can create one for yourself."

Robert Seropian offers clients a retirement strategy designed to provide guaranteed income for life, similar to a traditional pension. This approach ensures that clients receive a steady monthly income stream throughout their retirement years without the risk of outliving their savings. It also provides peace of mind, knowing their loved ones will be financially secure after they're gone.

Self funded guaranteed pension fund

For instance, one of Robert Seropian's clients, John, had accumulated \$2 million in retirement assets through diligent saving and investing. However, as retirement approached, John became increasingly concerned about the market's volatility and guaranteed income through his retirement. After working with Robert Seropian, John decided to use a portion of his assets to put into a guaranteed pension plan. This decision gave John a guaranteed monthly income stream, which allowed him to cover his living expenses and enjoy retirement without financial stress. John now spends time with his grandchildren, taking them on roller coaster rides while his savings remain securely invested, free from the stock market's volatility.

Lifelong Income, Guaranteed

This focus on security and peace of mind is central to Robert Seropian's philosophy. "Your retirement savings shouldn't be a gamble," he explains. "By investing in a self-funded pension, you're ensuring a stable, predictable income for yourself along with your spouse and protecting your family's future."

Tailored Solutions for Every Client

Each client's financial situation is unique, and Robert Seropian recognizes that a one-size-fits-all approach doesn't work regarding retirement planning. That's why he takes the time to carefully assess each client's assets, goals and needs before recommending a strategy.

For example, John's \$2 million retirement portfolio allowed him the flexibility to use a portion of his assets to purchase a guaranteed pension plan while keeping other funds liquid for short-term needs. In contrast, some clients will be more inclined to create a guaranteed income based on their personal needs. Whatever the case, Robert Seropian's approach is always client-centered, ensuring that every retirement plan is tailored to the individual's specific financial circumstances and future goals.
