

Slip Safety Expert Christian Harris Launches Groundbreaking Book "Prevent Slip Accidents with Slipology"

London, United Kingdom Sep 17, 2024 ([IssueWire.com](https://www.issuewire.com)) - Christian Harris, renowned slip safety expert and founder of Slip Safety Services, announces the launch of his new book, "Prevent Slip Accidents with Slipology: 5 Steps to ensure safety, reduce costs and protect your organisation". This comprehensive guide promises to revolutionise how organisations approach slip safety, the leading cause of workplace accidents and insurance claims.

With over 12 years of experience in the field, Harris has helped thousands of clients achieve a remarkable 57%+ reduction in slip-related incidents. "Prevent Slip Accidents with Slipology" distills this expertise into a practical, science-based approach that any organisation can implement.

"You can stop slip accidents. Use the science," says Harris, encapsulating the core message of his book. "Slipology isn't just about preventing accidents; it's about creating environments where people feel secure and valued."

Key features of "Prevent Slip Accidents with Slipology" include:

- The innovative CHIMES framework for comprehensive slip safety assessment
- Practical strategies for implementing effective slip prevention measures
- Real-world case studies demonstrating the successful application of Slipology principles
- Guidance on building a culture of slip safety within organisations

Rosie Russell, Co-President of The International Institute of Risk & Safety Management commented this about the book: "Christian takes a highly accessible approach to a common, and complex, topic that many practitioners consider to be too complex to handle. Slipology breaks slip prevention down and makes it possible, through good risk management, to, not only manage our risks but be able to evidence that our risks are ALARP and, as such, defensible should we ever need to. This is essential reading and a well-read copy should be on the shelf of every practitioner."

The book is set to become an essential resource for safety professionals, facility managers, and business leaders across industries. It offers a proactive approach to slip safety that not only enhances safety but also cuts costs and protects people.

"Prevent Slip Accidents with Slipology" is available for purchase from Amazon from 18th September 2024. In its first week, the book will be available for only 99p.

About the Author:

Christian Harris is the founder of Slip Safety Services and host of the Safety and Risk Success Podcast. He is a sought-after speaker at international conferences and events, known for his data-driven approach to slip safety.
