

Digicode receives ISO 27001 Certification for Information Security Management

Dallas, Texas Oct 18, 2024 ([IssueWire.com](https://www.issuewire.com)) - [Digicode](https://www.digicode.com), a leading provider of IT services and technology solutions, is proud to announce that it has successfully achieved the ISO 27001 certification. This globally recognized standard demonstrates Digicode's commitment to the highest levels of information security management, further solidifying its reputation as a trusted partner in the technology sector.

ISO 27001 is an internationally acclaimed standard for information security issued by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). This certification signifies that Digicode has implemented a systematic and risk-based approach to managing sensitive company and client information, ensuring it remains confidential, integral, and always available.

"This ISO 27001 certification underscores our dedication to ensuring that our client's data is protected with the most advanced security protocols. As a technology solutions provider with a growing portfolio that includes highly regulated industries such as FinTech, Healthcare, and iGaming, we understand the critical importance of information security. This certification affirms our ability to deliver secure, reliable services that meet the highest global standards." – Elkhan Shabanov, Digicode CEO Americas.

The certification process involved a rigorous external audit of Digicode's information security management systems (ISMS), which assessed the company's risk management practices, security policies, physical security controls, and ongoing commitment to monitoring and improving security measures.

By obtaining the ISO 27001 certification, Digicode has demonstrated its ongoing dedication to protecting the data of its clients, including Fortune 100 companies and innovative startups in over 50 industries, such as real estate, education, healthcare, and high tech.

With this achievement, Digicode joins the close group of companies that meet the gold standard for information security. The certification strengthens Digicode's position as a leader in the technology solutions space and reaffirms its ability to navigate the increasingly complex regulatory environments its clients face.
