Right Cause Launches Volunteer Management Module for Nonprofits

Indianapolis, Indiana Oct 21, 2024 (Issuewire.com**)** - Right Cause a leader in non-profit customer relationship management applications has come out with a new Volunteer Management Module which aims at improving the way volunteer work is carried out and coordinated in institutions regardless of their size. Right cause volunteer management which is built on the solid Microsoft Dynamics 365 framework enables the non-profits to address major needs such as volunteer dependencies for coordination and engagement and data management besides easing booking and communication.

Volunteers Management Optimization for Non-Profit

As the number of volunteers continues to increase and an organization's need for their help rises, there may arise issues such as scheduling conflicts, poor communication and glaring data inaccuracies. Such are some problems that Right Cause Volunteer Management CRM is set out to resolve by offering a centralized and integrated system through the clouds. From the process of recruiting and enlisting volunteers for tasks to mobile scheduling and even live progress monitoring and reporting and task management, Right Cause allows the institutions to concentrate on their primary goals while ensuring complete satisfaction for the volunteer participants.

"Right Cause Volunteer Management presents the non-profit sector practitioners with an innovative tool that, if well-utilised, can change the way their coordination of volunteer initiatives is conducted. Our tool enhances volunteer retention by eliminating mundane processes and providing real-time information about the volunteers' input.*"* commented Piyush Goel, CEO at Beyond Technologies LLC. "

Key Features of the Volunteer Management Portal:

- **Unified Volunteer Database-** It is a real time platform where all volunteer data can be gathered and retrieved from a single source.

- **Automated Scheduling-** Optimum use of a volunteer's time can be achieved by matching organizational requirements with the availability of human resources.

- **Integrated Communication Tools-** Email, SMS and internal messaging systems can be used to update volunteers.

- **Mobile Accessibility-** The volunteers can log in, perform their profile functions, and even chat over the web while on the move.

- **Real-time Reporting & Analytics-** Office components enable management to keep track of the volunteer hours, level of activity and even impact through power bi dashboards.

- **Event Management-** Params provide a simple and efficient system to help users schedule and coordinate events that require the help of a volunteer.

- **Compliance & Background Checks-** Background verification in organizations which involve volunteers can be made more efficient through the creation of automated systems that assist in the recruitment process.

- **Volunteer Portal-** It is a public center, enabling potential volunteers to register, edit their contact information and check how much work they have performed.

Tailored Use Cases

Right Cause Volunteer Management is used by the following non-profits in a more efficient way:

- **Humanitarian Aid:** Accessibility and easy scheduling and management of volunteers who are needed instantly during and for post emergencies.

- **Community services:** Ability to enable automatic volunteering or any volunteer related functions for communication programs.

- **Health Care Volunteering:** Hospitals Will Have Jobs Such As A Volunteer Coordinator Whose Main Job Is To Assign Volunteers Based On Their Skills But It Will Be Done Automatically.

Pricing for Nonprofits – Starts at Just $65/user/month

Comprehensive Service Offerings

In addition to the volunteer management platform, Right Cause provides:

- **Implementation & Customization:** Tailor the solution to your organization's unique needs.

- **Training & Ongoing Support:** Comprehensive staff training and continuous technical support.

- **Integration Services:** Seamlessly connect with tools such as Outlook, SharePoint, and Power BI for enhanced collaboration and insights.
