

Breathe Freely Anywhere: ible Airvida T1 Combines Wireless Audio with Cutting-Edge Air Purification

Eastern Taipei, Taiwan Dec 16, 2024 ([IssueWire.com](https://www.issuewire.com)) - When pollen season hits, do you feel trapped indoors? Or do summer wildfires make every breath a challenge? Introducing the Airvida T1 by ible, your ultimate solution for cleaner air—wherever you go.

Praised by allergy sufferers and those battling air pollution worldwide, ible's Airvida series has redefined air purification. Rated over 4.3 stars on Switzerland's BRACK.CH and Japan's Rakuten, Airvida is set to launch its latest innovation in 2025: the Airvida T1, true wireless Bluetooth earbuds with integrated air purification technology.

With advanced 30dB noise-canceling capabilities, the Airvida T1 effectively reduces pollen, PM2.5 (air pollutants), and even viruses, so you can breathe easier anytime, anywhere. Pair it with the Airvida Connect app to access real-time air quality and pollen level updates based on your location. Receive instant alerts and adjust ion output for maximum purification tailored to your needs.

Weighing just 9.5 grams per side, the Airvida T1 delivers over 5 hours of battery life for both air purification and music. Transform it into a desktop air purifier using the charging dock, which provides 3 additional charges for a total of over 20 hours of use—perfect for a full day out.

The Airvida T1 generates 3 million negative ions every 0.6 seconds around your face—equivalent to the ion output of 300 waterfalls. These ions quickly attract nearby pollen and pollutants, accelerating their fall and significantly reducing the chances of inhaling allergens and harmful substances.

Recognized with the prestigious CES Innovation Award, the Airvida T1 also holds patents in five countries, including the U.S. and Japan. In addition to its two CES Innovation Awards, ible's Airvida series has earned the German Innovation Award and Japan's Good Design Award, cementing its position as a leader in wearable air purification technology.

Don't let pollen or pollution hold you back. Discover the future of clean commuting—visit ible at CES 2025, January 7–10, at Eureka Park, Hall G, Venetian Expo, Booth 62501. Experience fresh air, anywhere!
