

## **launch of the Book 'Ethical Intelligence in AI' at the Minnesota State Capitol - Marking a New Era of AI!**

Ethical Intelligence in AI Unveils a Groundbreaking Book advocating 'Unified Global Governance', Distributed Free to Raise Global Public Awareness. This transformative work tackles the unaddressed challenges of AI marking a new era in the history

Saint Paul, Minnesota Dec 10, 2024 ([IssueWire.com](https://www.IssueWire.com)) - Ethical Intelligence in AI: Marking a New Era of Responsible AI

Launch of the book '**Ethical Intelligence in AI - The Need for Unification of Global Governance**' at Minnesota State Capitol in the Press Conference Room B971 on 12/16/2024 from 11:15 AM to 12:30 PM.

[Ethical Intelligence in AI](#) Launches a Groundbreaking Book Advocating 'Unified Global Governance' in AI. Addressing the unaddressed critical challenges of AI, this book presents a universal framework for integrating ethics into AI systems, bridging the gap between policymakers, tech leaders, governments, and users and set to distribute at free of cost.

We are proud to be the very first advocates for a unified global governance in AI, pioneering efforts to ensure ethical practices and responsible innovation worldwide.

Sravani Puli, Founder & CEO of Ethical Intelligence in AI, and the author of the book, said, '*This book is a call to action for global leaders to unite in establishing a unified global governance and fostering stringent principles for integrating ethics into AI systems globally to safeguard humanity from the potential downsides of this groundbreaking innovation.*'

Drawing an Analogy between AI governance and traffic rules, this study underscores the importance of strict administration where adherence is ensured through regulations and Penalties. From students heavily relying on AI for assignments to the threat to human intelligence and human traits, this book addresses each and every single aspect of the critical challenges posed by AI systems. Highlighting the dual nature of innovation, this book examines how groundbreaking advancements like AI can simultaneously drive progress and threaten humanity.

Encouraging readers to think ahead of the arc to safeguard future generations from the vulnerabilities of AI, it encourages readers to use AI responsibly. From users blindly accepting terms and conditions without understanding the risks to AI abusers exploiting technology to target specific groups, this book addresses the critical challenges surrounding AI and provides practical solutions for their mitigation.

Drawing on extensive research on the existing frameworks like UNESCO and OECD, the book critically evaluates their voluntary nature leaving the implementation fragmented across nations. This book underscores the urgent need for stringent AI laws and proposes a universal framework to enforce ethical principles uniformly across the globe.

### Event Details:

- **Date:** 12/16/2024 at 11:15 AM - 12:30 PM
- **Location:** Press Conference Room B971, Minnesota State Capitol, 75 Rev Dr Martin Luther King Jr Boulevard., St Paul, MN 55155
