

PitPat Launches Warm-up of Winter Championship - Second Half, Kicking Off the Winter Racing Fever

Houston, Texas Dec 20, 2024 ([IssueWire.com](https://www.IssueWire.com)) - [PitPat](#), the world's largest online competition platform, is dedicated to integrating technology with sports to provide a wide range of event experiences for running enthusiasts worldwide. By creating a convenient, fair, and high-quality online competitive environment, PitPat has become an essential partner in the fitness journeys of countless users. The launch of the *Warm-up of Winter Championship - Second Half* event not only serves as a warm-up for the first season's championship but also presents a fantastic opportunity for runners to push their limits and discover their potential. Whether competing for prizes or for honor, this event promises to be one to watch!

The event features generous prizes and points rewards, with a total prize pool of \$1,420. The top three finishers will receive \$500, \$300, and \$200, respectively. The top 100 participants will also earn various levels of PitPat points. A special dynamic prize pool mechanism has been set up for this event. From October to December 2024, every user who registers for a PitPat Tour sub-event will increase the prize pool by \$1. Multiple registrations by a single user will continue to accumulate, with the final prize pool cap set at \$50,000, creating an exciting atmosphere for the upcoming championship! The event will officially begin at 12:00 AM (EST) on December 19, 2024, with global runners racing in a 5-mile competition.

Kevin Zhang, CEO of PitPat implied that the *Warm-up of Winter Championship - Second Half* is not only an opportunity for event enthusiasts to challenge themselves and break through their limits but also a significant step for PitPat to connect global runners and enhance the online fitness experience. With innovation in technology and diverse events, PitPat allows every user to experience achievement and joy through exercise. In the future, PitPat will continue to drive the development of online events and build a dedicated competitive platform for global runners

Looking to get the best experience from PitPat's online events? Choose the [DeerRun](#) and [SupeRun](#) treadmills, which offer professional event support and an exceptional user experience. By connecting to the PitPat platform, you can participate in global online events anytime, anywhere, and enjoy the charm of cutting-edge running technology!

Outstanding Performance: A Balance of Speed and Stability

The treadmill features a high-performance motor, offering a multi-stage configuration of 1.2-3.6hp and supporting speeds of up to 5,400 RPM. The power output is stable, easily meeting the needs of everything from casual jogging to high-intensity sprints. With a wide speed range from 3.8 to 10 MPH, it suits both beginners and professional runners, ensuring that everyone can find their ideal pace. Additionally, the treadmill is equipped with an energy-efficient system that significantly reduces energy consumption even with prolonged use, balancing performance with environmental considerations.

Event-Centric Customization: Precision Tracking and Intelligent Analysis

The treadmill is equipped with multi-functional sensors that monitor speed, step frequency, stride length, heart rate, and environmental conditions like temperature and humidity in real-time. It provides comprehensive data support for runners. With advanced anti-cheating technology using acceleration sensors and gravity-sensing systems, it ensures the authenticity and fairness of online event results.

Moreover, the treadmill offers personalized performance data analysis, automatically generating individual reports that track calories burned, distance covered, and progress trends, helping users adjust their training plans scientifically.

High-Intensity Safety Design: Comfort and Durability

Constructed from high-strength carbon steel, the treadmill frame exceeds international standards for hardness. The frame is crafted using precision machining processes and is coated with a matte spray paint for a smooth feel and excellent wear resistance. The running belt's surface uses anti-slip, shock-absorbing materials to reduce impact on the knees while running, enhancing safety during exercise. Furthermore, the treadmill supports users weighing over 300 pounds, ensuring safe use for individuals of all body types.

About PitPat

As the world's largest online competition platform, PitPat is committed to creating a sports ecosystem that combines fun and professionalism. Looking ahead, PitPat will continue promoting the concept of scientific fitness and collaborate with more smart devices and sports brands to provide global runners with smarter, more social event experiences. PitPat aims to build an interactive community where users can motivate themselves and share in the benefits of healthy living. Join PitPat and start your journey to glory with every step!
