

Propress shows surprising uses of their clothes steamers by customers

17 Surprising uses for a Clothes Steamer

Sydney, New South Wales Dec 20, 2024 ([Issuewire.com](https://www.issuewire.com)) - Leading clothes steamer manufacturer reveals the surprising ways their customers use their steamers. In fact 10 of them!

Aside from steaming clothes, Propress customers report 10 alternative uses they put their steamers to around the house and beyond.

Curtains

[Propress](#) customers report this as the most common of all alternate uses. It's almost like steamers were made primarily for curtains and drapes. The fact that you don't need to take curtains down to freshen and remove creases, and the speed and ease, means that the iron alternative and the cumbersome draping of curtains on ironing boards and floors can now be a thing of the past.

Customers also report great results on other household items such as sofas, cushions, mattresses, sheets and pillowcases.

Traveling and staying in hotel

What seems to always happen after you check in to a hotel? You ask for an iron and ironing board to freshen up creases clothes from the suitcase. But some hotels might not have an iron and ironing board, it may be dirty or low quality, and your room might not have room to set up. Not so with a Propress MINI portable steamer. Simply hang clothes on the back of a door and steam away, and the MINI is small and portable enough for any trip.

Dry cleaning items

Delicates like costumes, dresses, vintage garments, suits and accessories like ties, scarves, even hats tend to go to the dry cleaners rather than the washing machine and iron treatment. But the Propress steamer handles these with ease and for a fraction of the cost.

Some of the more imaginative uses?

Cleaning and maintenance - Propress customers have written in about using their Propress for sanitizing non-clothing items like stuffed toys, backpacks, and handbags. Pet's bedding - Steaming to sanitize their pet's bedding and remove nasty odours. Home improvements - one Propress customer wrote in to report just how well his Propress steamer worked to strip paint from his wooden window frames.

The Propress steamer is also ideal for cleaning and sanitizing seat upholstery, floor mats, and roof liners. Reports of sleeping bags being steamed to freshen up, also backpacks and duffel bags that can develop quite nasty smells from being damp and dirty.

Footwear is another great application of the steamer, sanitizing and removing odours which gather over time.

Finally baby clothes and blankets to keep fresh and free from bacteria, helping to keep them allergen-free.
