

# AirGyde Names Nadeem Saeed as CEO to Shape Airspace Mobility's Future

New York, NY — January 7, 2025

**New York City, New York Jan 7, 2025 ([Issuewire.com](https://www.issuewire.com))** - AirGyde, a pioneering company in advancing airspace mobility solutions, is excited to announce the appointment of Nadeem Saeed as Chairman and Chief Executive Officer. With an extensive background in software engineering, operational excellence, and strategic leadership, Nadeem will spearhead the company's efforts to build solutions for a scalable and secure airspace mobility framework.

Nadeem brings a wealth of experience from renowned organizations, reflecting his decades-long leadership in innovation and operational excellence. His career includes leadership roles at Honeywell, Motorola, Nokia, Microsoft, INRIX, and Verizon, where he led transformative initiatives focused on technology innovation, quality improvement, and organizational growth. As the co-founder and visionary behind AirGyde, Nadeem is well-positioned to guide the company through a pivotal phase of growth.

**"Aviation is at a pivotal point,"** said Nadeem, CEO of AirGyde. **"With the convergence of manned and unmanned aircraft, we have a unique opportunity to reimagine airspace**

**management. I am honored to lead a team dedicated to building safe, privacy-friendly, connected skies and fostering collaboration across the aviation ecosystem."**

Under Nadeem's leadership, AirGyde will continue to develop cutting-edge solutions, including dynamic air traffic routing, real-time geofencing, and seamless integration with open-source mapping platforms. These advancements will empower regulators, drone operators, and urban planners to coordinate more efficiently as they prepare for the future of smart cities.

The company's advisory board, composed of seasoned experts in aviation and technology, will support Nadeem in strategic planning and governance. The board's quarterly meetings will focus on ensuring regulatory alignment, community engagement, and technological scalability.

### **About AirGyde**

Founded in 2024, AirGyde is dedicated to advancing airspace mobility through innovative technology solutions that enhance safety, efficiency, and collaboration in the skies. By defining the next generation of airspace mobility solutions, the company is committed to transforming airspace management and enabling sustainable aviation ecosystems.
