

Vistaar' Standards Management software upgraded for Medical Device Companies

Standards compliance made easy and affordable for Medical Device companies

Medical Device Standards Management

Princeton, New Jersey Jan 24, 2025 ([IssueWire.com](https://www.IssueWire.com)) - [Vistaar](#), a leading Regulatory compliance technology solution, announces the upgrade of its comprehensive **Standards Management Solution**. Predominantly designed to support medical device manufacturers centralize and manage global compliance standards. With a robust **standards library** and reliable **Monitoring**, the platform equips companies to ensure compliance with industry Standards.

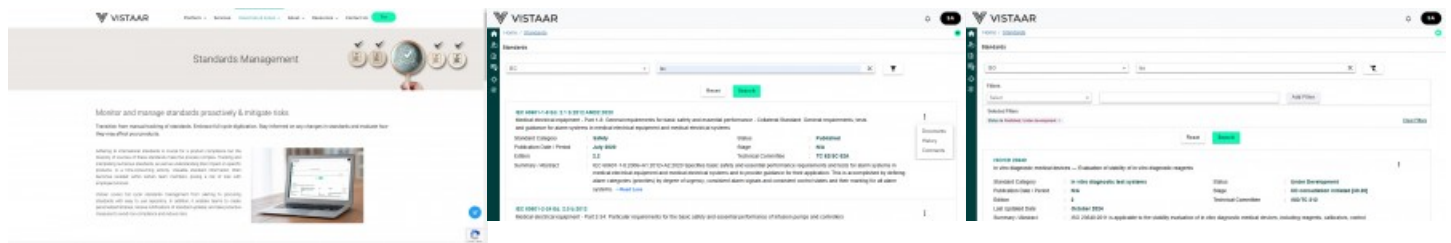

Highlights of the platform include:

- **Centralized Access:** One platform for all essential standards, including ISO, IEC, ASTM and ANSI, eliminating the need for multiple sources.
- **Real-Time Updates:** Automated alerts for the latest revisions and changes in regulatory standards.
- **Collaboration Features:** Simplified team workflows for document sharing, editing, and approval processes. Also included is Impact Assessment functionality to assess change

management necessity

“Countries requiring diverse Standards compliance, medical device companies need a simpler fit-for-purpose Compliance solution without complicated the process or making it expensive,” said Mahesh Malneedi, CTO at Vistaar. *“Our Standards Management Solution ensures that organizations stay compliant while improving efficiency and reducing operational risks while keeping costs as Bay.”*
