The infographic features a central map of India in dark blue, labeled 'INDIA'. Three dashed white arrows with ship icons point from India to three other regions: the United Arab Emirates (UAE) in green, the United Kingdom (UK) in light blue, and the United States (US) in pink. The background is a light grey world map with a large yellow arc on the right side. A purple speech bubble on the left contains the text 'Join rivexa and Start Sourcing Today.' The rivexa logo is in the top right, and social media icons for LinkedIn, Instagram, Facebook, and YouTube are in the bottom right. The website URL 'www.rivexa.com' is at the bottom left.

Dubai, United Arab Emirates Feb 26, 2025 ([Issuewire.com](http://Issuewire.com)) - rivexa by mjunction (A Tata Steel and Steel Authority of India Limited joint venture) is available for UAE brands seeking open and closed-die manufacturing of industrial components from India.

With its comprehensive manufacturing ecosystem, India has strategically positioned itself for custom open and closed-die manufacturing. The UAE, India's second-largest export destination, with exports reaching USD 31.3 billion in FY23 (India Briefing), represents a key market for these capabilities.

The CEPA agreement (UAEMOE), which removes tariffs on various Indian goods, projects India-UAE trade levels to exceed USD 100 billion, significantly benefitting the industrial manufacturing sector.

The CEPA's impact goes beyond numbers, creating streamlined routes for Indian industrial exports, particularly in custom open and closed-die manufacturing. Trade data shows bilateral merchandise exchange surged from USD 43.3 billion in FY20-21 to USD 83.7 billion in FY23-24 (Press Information Bureau). India's open and closed-die manufacturing services sector demonstrates its growing strategic importance in global manufacturing.

The demand for open and closed-die manufacturing continues to grow as India emerges as a preferred hub for global sourcing. The UAE, the second leading importer of Indian industrial goods with a 4.61% trade volume, demonstrates a strong bilateral trade relationship. Digitally driven export marketplaces like rivexa facilitate these evolving trade relationships by connecting UAE buyers with verified Indian manufacturers.

The marketplace facilitates procurement across various categories, including drawing-based [CNC machined parts](#), custom parts, replacement parts, drawing-based OEM aftermarket parts, and annual MRO supplies (bearings, belts, filters, valves, rollers, switches, connectors, etc.).

Through procurement support tools, supplier validation, shipping coordination, and payment processing, these platforms ensure seamless digital access to select Indian manufacturers, enabling easier access to India's manufacturing capabilities.
