

# Perfect Your Profile: Dr. Simon Ourian and Epione's Neustem Revolutionize Non-Surgical Enhancements

Redefining Beauty: How Dr. Simon Ourian's Neustem is Transforming Non-Surgical Cosmetic Solutions

**Beverly Hills, California Feb 28, 2025 ([Issuewire.com](https://www.issuewire.com))** - Renowned cosmetic dermatology expert [Dr. Simon Ourian](#) is once again redefining the beauty industry with his latest innovation: Neustem, exclusively available at Epione Beverly Hills. This groundbreaking, non-surgical enhancement technique is transforming how patients achieve a more youthful and sculpted profile without the need for invasive

procedures or lengthy recovery times.

Neustem utilizes advanced regenerative technology to stimulate collagen production naturally and enhance facial contours, delivering results that are both subtle and striking. Unlike traditional fillers or surgical lifts, Neustem is designed to harness the body's own regenerative capabilities, offering a more natural and long-lasting solution for common concerns, such as sagging skin, volume loss, and weak jawlines.

"Neustem is about achieving natural beauty without the downtime or risks associated with surgery," says Dr. Simon Ourian, founder of Epione Beverly Hills. "Our patients want results that look like them, only better—and that's exactly what Neustem delivers."

With patients traveling from South America, Europe, and beyond to receive treatments at Epione Beverly Hills, Neustem is rapidly gaining global recognition for its innovative approach to non-surgical enhancements. As a pioneer in cosmetic dermatology, Dr. Simon Ourian continues to lead the industry with cutting-edge solutions that prioritize patient safety, comfort, and satisfaction.

Neustem is ideal for individuals seeking:

- Jawline Definition: Sculpt and enhance jawlines for a more defined and youthful profile.
- Cheek Contouring: Restore volume and create natural contours without fillers.
- Skin Tightening: Stimulate collagen production for firmer, smoother skin.
