

Qova Security Introduces High-Security Tag Detachers to Strengthen Retail Loss Prevention

Baltimore, Maryland Mar 12, 2025 ([IssueWire.com](https://www.issuewire.com)) - Retailers are facing a growing **loss prevention** crisis as shoplifters and organized retail crime (ORC) groups find new ways to bypass **retail security solutions**. One of the biggest vulnerabilities? The unauthorized use of **security tag removers**.

To address this critical issue, [Qova Security](#), a leader in **retail security solutions**, has launched a **new line of tamper-resistant security tag removers**. These advanced detachers are engineered to prevent unauthorized access, ensuring that security tags remain an effective deterrent against theft.

Retailers Are Struggling with Unauthorized Security Tag Removal

Retail theft is at an all-time high, with **over \$100 billion in retail losses reported in 2024**. A major weakness in traditional **loss prevention** systems is the easy availability of counterfeit **security tag removers** online.

"Retailers are investing heavily in **security tags**, but shoplifters are exploiting vulnerabilities by using unauthorized detachers," said **James Mitchel, CEO of Qova Security**. "Our new high-security detachers eliminate this risk by ensuring that only authorized store personnel can remove security tags."

Qova Security's Advanced Security Tag Removers: Built for Maximum Protection

The latest **security tag removers** from **Qova Security** are designed with industry-leading security features to enhance **retail loss prevention** strategies:

- ❓ **Tamper-Resistant Technology** – Prevents unauthorized individuals from removing security tags.
- ❓ **Restricted Access Mechanism** – Works exclusively with Qova Security's high-security tags.
- ❓ **Heavy-Duty Construction** – Engineered for durability in high-traffic retail environments.
- ❓ **Fast & Efficient Removal** – This reduces checkout delays while maintaining maximum security.
- ❓ **Universal Compatibility** – Designed to work with **EAS (Electronic Article Surveillance) systems** and Qova Security's advanced security tags.

These innovative **retail security solutions** ensure that shoplifters cannot easily remove security tags, making stores safer and better protected against theft.

Why Retailers Need High-Security Tag Removers

Retailers across industries—including **apparel stores, electronics retailers, luxury boutiques, and supermarkets**—are constantly battling theft. One of the **biggest threats to retail security** is the increasing access to generic detachers, which allow thieves to remove **security tags** undetected.

"A store's **loss prevention** strategy is only as strong as its weakest link. If shoplifters can remove **security tags** with unauthorized detachers, retailers are left vulnerable," said **Mitchel**. "Our high-security **security tag removers** eliminate that risk and keep merchandise protected."

How Qova Security's Detachers Enhance Retail Loss Prevention

- Prevents shoplifters from using counterfeit security tag removers**
- Works exclusively with Qova Security's high-security retail security solutions**
- Improves store efficiency and checkout speed**
- Reduces inventory shrinkage and strengthens overall loss prevention measures**

Integrating Technology with Retail Security Solutions

Qova Security's **tamper-proof security tag removers** are part of a **comprehensive loss prevention** strategy, working alongside:

- **RFID Security Tags** – For real-time tracking and anti-theft protection.
- **EAS Systems** – To trigger alarms when items leave the store without proper deactivation.
- **Retailer-Only Access Controls** – These controls prevent unauthorized personnel from tampering with security devices.

"We don't just sell security products—we provide full-scale **retail security solutions** to help businesses protect their inventory," **Mitchel added.**
